ACKNOWLEDGEMENTS

Frik Kraukamp
Fred Croft
Chris Dickinson
Howard Harris
At Coetzee
Buildaid Communications
South African Bureau of Standards

The contributions of John Lane and Paul Boucher (Boutek division of CSIR) are gratefully acknowledged.

In addition, the Clay Brick Association extends its thanks to: The Joint Structural Division of the South African Institution of Civil Engineering and the Institution of Structural Engineers for assistance and constructive comments over the years.

The SABS, CSIR and NHBRC for access to information that have been used as a source of reference.

Numerous other CBA members who have over the years, played a huge part in developing the Technical Materials of the Clay Brick Association.

Lessons for South Africa from global trends in environmental labelling of buildings and construction products
FOREWORD

The Clay Brick Association of South Africa is proud to bring you the completely revised and revamped version of its well-received Clay Brick Technical Guide. The publication has not only undergone a full visual overhaul with a new look and feel and completely new illustrations, it has also undergone a complete revision of all its technical content.

With the complete revision of the SABS and its SANS codes, which included the new SANS 10400, we as the CBA felt it time to bring our technical guide up to speed with the new standards and in turn ensure it is the most up to date publication in regarding best practices for masonry walling. Taking a lot of its cues from SANS 10400 – Part K, the publication covers the need to know aspects of clay masonry from manufacture of clay units to accommodation of movement and standards for structural masonry, all in the pages of this handy guide.

One of the corner stones (no pun intended) of the Clay Brick Association is to preserve and uphold technical excellence within the clay brick industry, whether it be through the numerous technical projects we are involved in and promoting or through producing technical publications such as this.

Upholding the great name of clay brick as one of the earth’s most sound and versatile building materials will always remain our passion.

We have also included three new chapters on sustainability, energy efficiency standards, thermal comfort and the role clay brick has to play in complying within the eco space. Whether you are an experienced clay mason, brick manufacturer or trainer, this publication offers invaluable professional insight into clay masonry.

Jonathan Prior
Executive Director
Clay Brick Association of South Africa
# CONTENTS

## CHAPTER 1. CLAY BRICK MANUFACTURE

- Overall Dimensions and Tolerances
- Warpage and Tolerance
- Brick Strength
- Efflorescence
- Irreversible Moisture Expansion
- Other Properties
- Durability: Selection Criteria
- Initial Rate of Absorption
- Fire Resistance
- Acoustic Insulation
- Thermal Properties

## CHAPTER 2. KNOW YOUR CLAY BRICKS

## CHAPTER 3. PRODUCT SPECIFICATION AND PHYSICAL PROPERTIES

<table>

## CHAPTER 6. CLEANING OF CLAY BRICKWORK

| General Precautions               | 31 |
Preparation
Mortar and Mortar Smear
Lime and Lime Bloom
Vanadium
Efflorescence
Lichens and Mosses
Running Water
Various Oils
Paint
Rust or Iron
Manganese
Timber
Smoke and Soot
Tar
Large Projects - Multi-storeyed Buildings

7. CONSTRUCTION DETAILS

8. SUSTAINABILITY AND RELEVANCE OF CARBON EMISSIONS

Concepts of Sustainability
Greenhouse Gases
Carbon Footprint
Life Cycle Assessment/s
National Emission Reduction Programme/s
Green Building Rating System/s
Green Product Labelling System/s
Environmental Product Declarations
Conclusions; The impact of the above issues on the Clay Brick Industry

9. THERMAL EFFICIENCY & COMFORT ACHIEVED WITH MASONRY WALLING

Human Comfort & Adaptive Theory
Benefits of Providing Comfort in Buildings
Building Human Comfort into Building Designs
Passive Design Strategies for the various RSA Climates
Thermal Resistance (R-value)
Thermal Mass or Thermal Capacitance

10. COMPLIANCE WITH REGULATIONS & STANDARDS

Introduction
Amended Regulations
SANS 10400XA Satisfies the Regulations
Guidance and Comments as the choice of Compliance Routes
Compliance with Regulation & Standards for masonry walling in South Africa
CR-value Application
